Subject: Fwd: Gas pipeline in Oklahoma

I thought you would be interested in the latest comment that we received.

This is just another reason why the MOA should not be granted to SJGas! Please place this article in the record.

http://www.cbsnews.com/8301-201_162-57606625/okla-pipeline-blast-sparks-huge-blaze-spurs-evacuations/

There are many residences, a couple of churches, Masonic lodge and 2 fire stations within 100 feet of the proposed gas pipeline through the Pinelands. Even Oyster Creek was state-of-the art with all modern, "unbeakable" materials, but like us all we begin to bend and wear out just like the metal in these structures.

I hope you do the right thing and deny this MOA. We need the Pinealnds intact.

Thank you very much,
georgina shanley
